# AI Governance for Business Professionals Certification

E-Learning
Modality

English
Language

Build the skills to understand, assess, and govern AI systems in your organisation — without needing a technical background. In just a few days, you'll gain practical knowledge on AI fundamentals, risks, and governance standards such as the EU AI Act, ISO/IEC 42001, and the NIST AI RMF.

Through three intensive courses, a hands-on capstone, and a final exam, this programme enables business professionals to contribute meaningfully to responsible AI strategies, risk mitigation, and compliance oversight. Upon completion, you'll be eligible for the Certified AI Governance Professional credential issued by BABL AI.

Learning Objectives

By the end of the course, you will be able to:

✓ Identify AI systems and understand their business impact

✓ Recognise risks linked to AI deployment and misuse

✓ Apply basic frameworks for AI risk analysis

✓ Align organisational practices with leading AI governance standards

Who Should Attend?

🔍 Business leaders and non-technical managers

⊗ Professionals in legal, compliance, HR, operations, marketing

💻 Governance and ethics officers

💻 Risk managers in AI-enabled environments

🛡 Anyone overseeing or influencing the use of AI in business
