

AI for Legal Professionals

 E-Learning
Modality

 English
Language

This course has been developed for BABL AI as a focused companion to its AI Governance for Business Professionals Certification. Designed for legal practitioners, the course provides the insight and capability needed to navigate AI-related risks and safeguard enterprise value.

The curriculum is structured around three core themes: Practical uses of AI in legal workflows, legal risk management in AI driven contexts and Legal's strategic role in enterprise AI Governance.

By the end of this course, Participants will develop a clear understanding of AI's enterprise role, legal oversight obligations and the limitations of automated decision systems.

Through case-based examples and implementation tools, participants learn to implement oversight controls, supervise AI usage and develop enforceable policies grounded in legal reasoning.

This course builds on participants' legal competence for AI governance: practical, risk-aware and directly applicable to professional practice.

Learning Objectives

By the end of the course, you will be able to:

- ✓ Developing a systematic approach to AI risks
- ✓ Gaining an Awareness of AI's limitations
