

EU AI ACT: Governance of the AI Act

 E-Learning
Modality

 English
Language

 3 weeks
Duration

This course offers a focused and practical understanding of how AI governance works under the EU AI Act. It covers the full regulatory architecture—at both EU and Member State levels—including the roles of key oversight bodies and the procedures for conformity assessments. Participants will learn how to ensure AI systems meet legal and ethical requirements, implement risk and compliance controls, and respond to enforcement actions. The course also explores how to apply voluntary codes of conduct and integrate cybersecurity into AI system governance to minimise liability and build trust.

Learning Objectives

By the end of the course, you will be able to:

-  Understand the AI Act's governance structure at Union and national levels
-  Learn the roles of the AI Office, national authorities, and notifying bodies
-  Navigate conformity assessments and certification processes
-  Implement responsible AI practices including cybersecurity and post-market monitoring
-  Identify sanctions for non-compliance with prohibited, high-risk, or misleading AI use
-  Recognise the role of voluntary codes of conduct and frameworks like ISO/NIST

Who Should Attend?

-  Legal advisors and in-house counsel
-  AI compliance and risk officers
-  Governance and audit leads
-  Executives and managers overseeing AI initiatives
-  Certification and conformity professionals

What's Included?

-  Includes access eLearning platform with video lessons, exercises, and practical case questions
-  Certificate of course completion
