ISO 27001 Practitioner

Online instructor-led Self-study
Modality

English
Language

1 days
Duration

Build a solid understanding of Information Security Management Systems (ISMS) with the ISO/IEC 27001 Foundation course by TRECCERT. Designed for professionals beginning their journey in information security, this course provides a practical overview of ISO/IEC 27001:2022 — including its structure, requirements, and best practices for securing information assets.

In just one day, you'll gain foundational knowledge to support ISMS implementation and compliance across organisations. After passing the exam, you'll earn the Certified ISO/IEC 27001 Foundation credential — an internationally recognised validation of your capability to contribute to secure, resilient systems.

Learning Objectives

By the end of the course, you will be able to:

- Understand the structure and purpose of ISO/IEC 27001:2022 and its evolution

- Interpret the core principles of ISMS and information security governance

- Identify key security controls and requirements that support risk-based security management

Who Should Attend?

Information Security Analysts, Managers, Project Managers, and Officers

Business Owners, COOs, and CFOs

Security Engineers, QA Managers, Penetration Testers, and SOC Analysts

Professionals beginning a career in information security or compliance
