

ISO 27005 Foundation

 Online instructor-led
Self-study

Modality

 English
Language

 2 days
Duration

Understand the fundamentals of information security risk management with the ISO/IEC 27005 Foundation course. In just 2 days, you'll gain a structured overview of ISO/IEC 27005 — including context establishment, risk assessment, risk treatment, communication and consultation, as well as monitoring and review processes.

This entry-level course introduces you to the concepts, methods, and guidelines for managing information security risks and prepares you to support or initiate a risk management programme. After passing the exam, you can apply for the PECB Certificate Holder in ISO/IEC 27005 Foundation credential — a recognised validation of your foundational knowledge in IS risk management.

Learning Objectives

Upon successful completion of this training course, you will be able to:

- ✓ Describe the main risk management concepts, principles, and definitions
- ✓ Interpret the guidelines of ISO/IEC 27005 for managing information security risks
- ✓ Identify approaches, methods, and techniques used for the implementation and management of an information security risk management programme

Who Should Attend?

-  Risk management professionals
-  Professionals wishing to get acquainted with the guidelines of ISO/IEC 27005 for information security risk management
-  Personnel tasked with managing information security risks in their area of responsibility
-  Individuals interested in pursuing a career in information security risk management

What's Included?

-  200+ pages of training material and practical examples
-  Certification and exam fees
-  Course completion attestation, granting 14 CPD credits.
