Duration

Get started with privacy information management through the ISO/IEC 27701 Foundation course. In just 2 days, you'll learn the key principles, structure, and requirements of a Privacy Information Management System (PIMS) based on ISO/IEC 27701, and understand how it extends ISO/IEC 27001 and ISO/IEC 27002 to incorporate privacy controls for personally identifiable information (PII).

This course provides a solid foundation in PIMS implementation and governance and prepares you to support privacy initiatives across security, legal, and compliance teams. After passing the exam, you can apply for the PECB Certified ISO/IEC 27701 Foundation credential — demonstrating your understanding of privacy risk, regulatory alignment, and data protection best practices.

Learning Objectives

By the end of the course, you will be able to:
