

Introduction to Responsible AI

 E-Learning

Modality

 English

Language

This course provides an essential overview of AI technologies, the ethical and societal challenges they pose, and the regulatory landscape governing their use. In just under an hour, we'll explore the technical aspects of AI, delve into issues such as bias and privacy, and discuss how organisations can manage the risks associated with these technologies. We will also introduce you to the compliance requirements of the EU AI Act, ensuring you are equipped to contribute to your organisation's responsible use of AI.

Learning Objectives

By the end of the course, you will be able to:

- Understand the essential principles and practices shaping the future of AI.
- Navigate and contribute to the rapidly evolving world of responsible AI.

Who Should Attend?

 Anyone wanting to understand the basics of responsible AI

 No legal or technical background required

• Certification & Exam

- ❑ **Certificate:** Certified Introduction to Responsible AI Professional (by BABL AI)
